

EDEN CHRISTIAN ACADEMY AFTER SCHOOL LEGO CLUB

Description

Take a journey through our Life Sciences unit as we explore our fascination of living things – past and present. During this five week unit we'll explore topics like the Dinosaur Age, the amazing life cycle of a butterfly, and unusual creations like the Venus Fly Trap -- a plant that eats bugs! This is a hands on one hour class in which students build one of a kind LEGO motorized models all designed by our engineers. Instructional content is multidisciplinary. It builds problem solving skills, and introduces kids to the beginning principals of architecture and engineering. All in a fun and enriching environment.

When: Mondays Nov. 20 - Dec. 18
Time: 3:30-4:30 PM
Where: Eden Cafeteria
Who: 1-5th Grade
Costs: \$55.00

All materials are provided.
